

techniques. She has been provided with instruction in the use of dynamic equipment such as therapy balls, bolsters, scooters, and swings. She has shown increased animation, flexibility, and creativity during her attempts to engage the patients in treatment activities over the past several weeks. She has shown improvements in her ability to document treatment notes to reflect skilled

*I cannot say enough about your performance. You were able to take direction and implement suggestions with obvious success... very impressive! You were a joy to supervise, and I know you will be an asset in any setting.*
